

## **LSB Industries, Inc. Subsidiary, El Dorado Nitrogen, L.P. Receives OSHA Star Site Award for Baytown, Texas Facility**

March 9, 2015

OKLAHOMA CITY--(BUSINESS WIRE)--Mar. 9, 2015-- LSB Industries, Inc. (NYSE:LXU) ("LSB" or "the Company"), a producer of chemical products for the agricultural, mining and industrial markets and a leading manufacturer of commercial and residential climate control products, today announced that its El Dorado Nitrogen L.P. ("EDNLP") subsidiary's operation at the Bayer MaterialScience complex in Baytown, TX has been recertified by the Occupational and Safety Health Administration ("OSHA") as a Star Site. This represents OSHA's highest award level under its Voluntary Protection Program ("VPP").

OSHA's VPP promotes effective collaboration between facility management, labor and OSHA to establish comprehensive worksite-based safety and health systems. EDNLP has been deemed a Star Site, which is the highest possible recognition for employers and employees who demonstrate exemplary achievement in the prevention and control of occupational safety and health hazards and the development, implementation and continuous improvement of their safety and health management systems.

"We are very proud of our team at Baytown," stated Barry Golsen, LSB's President and Chief Executive Officer. "EDNLP first implemented the program and received Star Site certification in 2003, and has demonstrated continual improvements to its health and safety management system since that time. EDNLP has had no recordable incidents at the facility for nearly ten years, performance that is further recognized by OSHA as being significantly better than the industry average."

### **About LSB Industries, Inc.**

LSB is a manufacturing and marketing company. LSB's principal business activities consist of the manufacture and sale of chemical products for the agricultural, mining, and industrial markets, and the manufacture and sale of commercial and residential climate control products, such as water source and geothermal heat pumps, hydronic fan coils, modular chillers, large custom air handlers and make-up air units.
